Concord, Massachusetts 01742 (US)**

(74) Representative : **Bass, John Henton et al
REDDIE & GROSE 16 Theobalds Road
London WC1X 8PL (GB)**

(54) **Three-dimensional printing techniques.**

(57) A process for making a component by (A) depositing a first layer of a powder material in a confined region and then (B) depositing a binder material to selected regions of the layer of powder material to produce a layer of bonded powder material at the selected regions. Such steps are repeated a selected number of times to produce successive layers of selected regions of bonded powder material (C) so as to form the desired component (D). The unbonded powder material is then removed (E). In some cases the component may be further processed as, for example, by heating it to further strengthen the bonding thereof.
